

User Manual for PDR functions in SRT 7335 CI/SRT 8300 CI/SRT 8345 CI

The following manual describes the new functions with the PDR Software.

1. Switch ON your receiver and connect the external USB-Hard disk to the USB connector at the rear panel of the receiver.
2. If the USB-Hard disk is recognised successfully you will get message to format your device to FAT32 in "*Application*" > "*USB*" menu.
3. Then press the **Yellow (Format)** button to confirm. After ~10 to 20 sec. formatting will be finished and you can exit the menu with **MENU** or **EXIT** button.
4. Go to "*Application*" > "*PDR*" menu to adjust the recording duration.
5. Set Timeshift to *OFF* or *ON* as preferred.

Now you are ready to use the PDR functions.

Record:

- a) Select a desired channel you want to record.
Press the ● (Record) button on your RCU to start recording.
- b) In EPG select the event you want to record and press the ● (Record) button.

Play:

If you already have done records call up the "*Recording File List*" by pressing ► (Play). Then select the file with the ▼▲ buttons and start playback by pressing **OK**.

You can activate Fast Forward or Fast Rewind during playback by pressing the ◀◀ or ▶▶ buttons. Another pressing of these buttons will change the speed (FF: x2, x4, x8; FR: x1, x2, x4, x8).

To chose a specific position or scene in the playback press **INFO** and choose the desired position with the ◀▶ buttons.

Timeshift:

Timeshift in TV mode: press || (Pause), the picture will get frozen. To continue watching the programme press ► (Play).

You can activate Fast Forward or Fast Rewind during Timeshift by pressing the ◀◀ or ▶▶ buttons. Another pressing of these buttons will change the speed (FF: x2, x4, x8; FR: x1, x2, x4, x8).

To choose a specific position or scene in Timeshift mode press **INFO** and choose the desired position with the ◀▶ buttons.

To leave Timeshift press ■ (Stop).
